鶴梅柚子 Tsuru-Ume Yuzu 650

鳳凰美田 Ho Oh Biden 650

**Yuzu** is a Japanese citrus lemon that is valued for its highly aromatic rind and Yuzu is one of the few citrus in the world that is able to maintain its tart/sourness at high cooking temperatures. Because the yuzu is considered a citron, the juice is very minimal, thus often expensive. Outside of a few Asian cuisines and particularly in Japanese cultural circles, yuzu is seldom grown or used because it's rather rare. Used in both green and more ripe, yellow forms it's a prized citrus in the culinary world.

Yuzu is sour, tart, very fragrant and slightly smaller than a billiard ball. The intensity and aroma of fresh yuzu is incredible. Yuzu is a citrus that isn't eaten straight, but is used as a souring ingredient through the use of its juice and zest. The flavor is reminiscent somewhere between a classic Eureka lemon and an oro blanco grapefruit, but still has its own unique fragrance and flavor. It is a bit more floral and sour and utterly wonderful. It smells so good the Japanese will use yuzu for perfumes and will ritualistically bath in yuzu during Toji (winter solstice).
